Tchaikapharma High Quality Medicines Inc. is a commercial corporation, founded and engaged in activities, according to the Orders of the Commerce Act and was registered under the judgement of the District court of Varna, passed on the company case № 1096 from the 14.03.2000.

With the decision of the Supreme District Court № 8866 from the 10.10.2007 and the Decision of the Sofia City Court from the 09.11.2007 the headquarters and the address of the head administration changed - from Varna, Primorski Region, residential District Tchaika, 1 Nikola Vapcarov Str., to Sofia, District Izgrev, 1 G. M. Dimitrov Blvd. The company is listed in the Registry of the commercial corporations as a joint-stock company under company case № 16559/2007 of the Sofia City Court.

As of 21.05.2015 Tchaikapharma High Quality Medicines Inc. is a public company according to Public Offering of Securities Act.

2. Foundation date and duration in time:

Tchaikapharma High Quality Medicines Inc. was founded in 2000. The duration of the Company is not limited in time.

3. Country of Company foundation, headquarters, address of the head administration, telephone, fax, e-mail and web page:

Country:	Bulgaria
Headquarters address:	Sofia, 1 G.M.Dimitrov Blvd.
Correspondence address:	Sofia, 1 G.M.Dimitrov Blvd.
Telephone:	02 / 960 37 14
Fax:	02 / 962 50 59
E-mail:	tchaika@tchaikapharma.com
Web page:	http://tchaikapharma.com

4. Scope of activities

The scope of activity of the company is the manufacturing and sales of pharmaceuticals in a processed or reprocessed form.

5. Capital

The capital of the company is BGN 72 200 000 (seventy-two million and two hundred thousand BGN), distributed in 72 200 000 ordinary registered shares with a nominal value of BGN 1.

6. Members of the managing and supervisory bodies, senior management and employees

TCHAIKAPHARMA HIGH QUALITY MEDICINES INC. has a one-tier system of management - Board of Directors:

Biser Rosenov Georgiev – Executive Director and Member of the Board of Directors
Krasimir Petrov Videlov – Chairman of the Board of Directors
Ivan Boichev Nikolov – Member of the Board of Directors

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

For the fourth quarter of 2018 the members of the Board of Directors received remuneration according to their contracts. There were no contingent or deferred fees incurred during the year. The Company does not owe any amounts for pensions, retirement compensations or similar benefits to members of the Board of Directors.

The average number of employees of TCHAIKAPHARMA HIGH QUALITY MEDICINES INC. as of 31.12.2018 was 133 employees (as of 31.12.2017 – 133 employees). The key personnel have higher education and are highly qualified. The support staff have secondary education.

7. Management's responsibility for the financial statement preparation

The management is responsible for the preparation and fair presentation of the non-consolidated financial statement in accordance with the International Financial Reporting Standards as adopted in the European Union. This responsibility includes: the design, implementation and maintenance of the internal control system relevant to the preparation and fair presentation of financial statement that is free from substantial inaccuracies, errors and discrepancies, whether due to fraud or error, selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in these particular circumstances.

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES OF THE COMPANY

Bellow are described the accounting policies applied in the preparation of financial statements. These policies have been consistently applied to all years presented, unless otherwise stated.

1. Basis for preparation of the financial statements

These financial statements has have been prepared in accordance with International Financial Reporting Standards (IFRS) as approved by the European Union.

The Company has prepared these unconsolidated financial statements for presentation to shareholders, tax authorities and Trade Register in accordance with the requirements of the Bulgarian legislation.

The financial statements have been prepared in accordance with the historical cost principle, which is limited in cases of revaluation of certain property, plant and equipment, investment property, financial assets held for sale and financial assets and liabilities reported at fair value in profit or loss.

The preparation of the financial statements in conformity with IFRS requires the use of certain approximate accounting estimates. When applying the accounting policies of the Company, the management used its own judgment. The elements of the financial statement, the presentation of which includes a high degree of judgment or subjectiveness, as well as those elements where assumptions and estimates are significant to the financial statement as a whole, are disclosed separately.

The management of the Company applies IFRS/IAS as the basis for ongoing reporting and the preparation of annual financial statements. In preparing the annual financial statements for the current year management has complied with the following standards and interpretations:

IAS 1 Presentation of financial statements

IAS 2 Inventories

The company applies the amendments to International Accounting Standards, which are effective for annual periods beginning on or after the 1st of January, 2016. The changes were adopted with the following acts:

1. REGULATION (EU) 2015/2113 of the Commission from the 23rd of November 2015 amending Regulation (EC) No. 1126/2008 adopting certain international accounting standards in accordance with Regulation (EC) No. 1606/2002 of the European Parliament and of the Council in connection with the international accounting standards 16 and 41.

2. REGULATION (EU) 2015/2173 of the Commission from the 24th of November 2015 amending Regulation (EC) No. 1126/2008 adopting certain international accounting standards in accordance with Regulation (EC) No 1606/2002 of the European Parliament and of the Council in connection with the International financial reporting standard 11.

3. REGULATION (EU) 2015/2231 of the Commission from the 2nd of December 2015 amending, in connection with the international accounting standards 16 and 38, Regulation (EC) No. 1126/2008 adopting certain international accounting standards in accordance with Regulation (EC) No. 1606/2002 of the European Parliament and the Council.

4. REGULATION (EU) 2015/2343 of the Commission from the 15th of December 2015 amending Regulation (EC) No. 1126/2008 adopting certain international accounting standards in accordance with Regulation (EC) No. 1606/2002 of the European Parliament and of the Council in connection with the international financial reporting standards 5 and 7 and international accounting standards 19 and 34.

5. Regulation (EU) 2015/2406 of the Commission from the 18th of December 2015 amending Regulation (EC) No. 1126/2008 adopting certain international accounting standards in accordance with Regulation (EC) No. 1606/2002 of the European Parliament and of the Council in connection with the International accounting standard 1.

2. Investments in subsidiaries and associated companies

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

For shares held in subsidiaries, joint ventures, associated enterprises and unconsolidated structured entities the requirements of IFRS 12 Disclosure of interests in other entities are followed. The information about the significant assessments and assumptions determining the control, joint control, significant influence and the type of joint venture is disclosed.

For shareholdings in subsidiaries the information about the composition of the group, the participation of non-controlling shareholdings, the significant restrictions on the ability to access assets and settlement of liabilities, the nature of risks with holdings in consolidated structured entities and other requirements is disclosed. For each subsidiary the name, principal place of business, the share of participation of non-controlling shareholdings, profit or loss for the non-controlling shareholdings accumulated non-controlling shareholdings and summarized financial information are disclosed. The nature and extent of significant restrictions is disclosed.

For shareholdings in joint ventures and associated enterprises the information about the nature, extent and financial impact and nature of the risks is disclosed. For each essential joint and associated enterprise the name, nature of the relationship, principal place of business, equity assessment under the equity method or at fair value, aggregated financial information are disclosed. The nature and extent of significant restrictions is disclosed.

For shareholdings in unconsolidated structured entities the information about the nature and scope and nature of the risks is disclosed. For the nature of shareholdings the qualitative and quantitative information is disclosed. For the nature of the risks additional information is disclosed.

Investments are accounted for using the cost method whereby participatory stakes are stated at cost less accumulated impairment losses. In the statement of comprehensive income the investment income is reported only to the extent of the share received of the accumulated profits of the company, which is invested in, in the form of dividends.

3. Segments reporting

The business segment is a group of assets and a business operation engaged in providing products or services and is subject to risks and benefits different from those of other business segments. The geographical segment is engaged in providing products or services within a particular economic environment and is subject to risks and benefits different from those in other economic environments. The segment reporting is not required for presentation in the unconsolidated financial statements of the company that is not part of the group.

4. Foreign currency transactions

(1) Functional currency and presentation currency

The separate items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in BGN, which is the functional currency. BGN was pegged to the Euro on 1 January 1999 under the arrangements the Currency Board introduced in Bulgaria.

(2) Transactions and balances

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

The transactions in foreign currencies are converted into functional currency using the exchange rates prevailing on the respective day. Profits and losses from changes in the exchange rates arising from the settlement of foreign currency transactions and from the translation at the closing exchange rate of foreign currency denominated assets and liabilities are recognized in the comprehensive income statement.

Critical exchange rates:	31 th of December 2018
	BGN
1 US dollar is equal to	1.70815
1 Euro is equal to	1.95583
1 British Pound	2.18643
1 Swiss Franc	1.73558

Changes in the fair value of monetary securities denominated in foreign currency classified as financial assets available for sale are analyzed and divided into changes resulting in amortized cost and other changes in the carrying value. Exchange differences related to the changes in the amortized cost are recognized in the profit or loss, while the other changes in the carrying amount are recognized in the equity.

Differences from the adjustments of non-monetary financial assets and liabilities such as equities at fair value through profit or loss are recognized in the profit or loss as part of the profit or loss relating to the translation of their fair value. Differences from the adjustments of investments held to maturity are recognized in the statement of comprehensive income.

5. Property, plant and equipment (PPE)

Land and buildings (except for the investment properties) are presented at fair value. When fair values are used, the requirements and rules of IFRS 13 Fair value measurement are followed. Proceeding from transactions of sales of the asset or transfers of the liability carried out on the principal market or most advantageous market, including transportation costs and excluding other transaction costs.

The management uses the fair value hierarchy, and if possible the assessment is at level 1 according to the prices in the active markets. If the level 1 cannot be used, we proceed to level 2, direct or indirect monitoring of the prices. The last option is a level 3, developing of hypotheses. The overall assessment of fair value is categorized by the level of the fair value hierarchy, where is located the lowest level hypothesis relevant to the overall assessment.

For fair value assessment the most appropriate method is used. The approach of market comparisons is based on the current market price, recently achieved market price or market price adjusted for similar item. It is applied to investment properties, debt or equity instruments on the exchange /shares and bonds/, investments outside the stock exchange and biological assets. The approach based on costs is based on estimates of the cost of replacement with a new asset, age and condition of the asset and the economic level of depreciation. It is applied to fixed tangible assets and fixed intangible assets. The approach based on income is based on direct methods for calculating cost savings, pricing with a premium, exemption from legacy license fees, excess profits or indirect methods of return on assets, residual profit, to align the assumptions for cash flows and discount rate. It is applied for impairment of non-financial liabilities, financial instruments and units generating cash flow.

The management discloses the reported items whose fair value is in the balance sheet. When necessary and materially, the fair value of the reported items that are not included in the balance

EXPLANATORY NOTES TO

THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018

sheet is disclosed. The fair value is assessed based on the regular assessment by an independent external valuer, decreased by the subsequent depreciation of buildings. The accumulated depreciation at the date of revaluation is eliminated against the book value of the asset and the resulting net amount is corrected by the reevaluated amount of the asset. All other machinery and equipment are stated at historical cost decreased by the accumulated amortization and impairment. The historical cost includes the expenditure that is directly attributable to the acquisition of the asset.

The value materiality thresholds for property, plant and equipment approved by the Company is BGN 700.

The subsequent costs are added to the balance amount of the asset or are reported as separate asset only when it is probable that the Company will generate future economic benefits associated with the use of the asset and when their carrying amount can be measured reliably. All other expenses for repairs and maintenance are recognized in the income statement for the period in which they are incurred.

The increases in the balance amount arising from the revaluation of land and buildings are related to the revaluation reserve. Reductions that offset previous increases on the same asset are related to the revaluation reserve, all other decreases are related to the statement of comprehensive income. Upon disposal of revalued assets accumulated for them revaluation reserve is transferred to retained earnings from previous periods.

The land is not depreciated. Depreciation of other property, plant and equipment is calculated using the straight-line method to allocate the difference between the carrying value and the redemption value over their estimated useful lives, using the following depreciation rates (in percentages):

Buildings and equipment	4%
Machinery and installations	30%
Computers and peripherals	50%
Furniture, fixtures and fittings	15%

The residual value and useful live of assets are reviewed, and if necessary, the appropriate adjustments are made to any date of the financial statements preparation.

The balance amount of the asset is reduced immediately to its recoverable amount in cases where the balance amount of the asset is greater than its estimated recoverable amount (Appendix 2.8).

Profits and losses from sales of PPE are determined by comparing the proceeds from sales with the carrying amount and they are included in the profit or loss.

The loan costs for PPE are reported as current expenses in the period to which they relate.

6. Investment properties

The investment properties are most often the buildings or parts of the buildings which are not used, but are owned by the Company to be given in the form of operating lease. The investment properties are measured at fair value, which is their market value determined by independent valuers annually or at a greater period of time when there is a substantial change in fair values. Changes in fair value are

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

recognized in the comprehensive income statement as part of the other income. As of the end of the current year the company has no investment properties available.

7. Intangible assets

The acquisition costs of patents, licenses, software and trade marks are recognized as an asset at historical value decreased by the accumulated depreciation and impairment losses. They are depreciated on a straight-line basis over their useful lives, but not more than 20 years. Intangible assets are not revalued. The management performs annual reviews for impairment and where the carrying amount of the asset is greater than its estimated recoverable amount, it is written down to its recoverable amount.

For intangible assets the following rates of depreciation in percents are used:

Intellectual property rights	15%
Software	50%
Other intangible assets	15%

8. Assets impairment

Assets that are amortized and investments in subsidiaries and associates companies are reviewed for impairment when the events or changes in the circumstances indicate that the carrying amount is not recoverable. An impairment loss is recognized for the amount by which the carrying value exceeds the recoverable amount. The recoverable amount is the higher than the net selling price and the value in use. To determine the value in use, the assets are grouped at the lowest identifiable unit level generating cash flows.

9. Financial assets

The Company classifies its investments in the following categories: financial assets at fair value through profit or loss, loans and receivables, held to maturity investments and financial assets available for sale. The classification depends on the purpose for which the investments were acquired. The management determines the classification of its investments at the time of purchase.

(a) Financial asset reported at fair value through profit and loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for sales purposes in the short term. Assets in this category are classified as current assets.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determined payments that are not quoted in active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date which are classified as non-current. Company loans and receivables are included in the balance sheet under the category of "trade and other receivables" and cash and cash equivalents (Appendices 2.10 and 2.11).

(c) Investments held to maturity

The investments held to maturity are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company has the intent and ability to hold to maturity.

(d) Financial assets available for sale

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

The financial assets available for sale are non-derivative assets that are intended for that category or are not specified in other categories. They are included in non-current assets unless the management intends to dispose of its investments within a period of up to 12 months.

The purchase and sale of investments are recorded taking into account the trade date, i.e. the date when the Company commits to purchase or sell the asset.

The investments are initially recognized at fair value plus the transaction costs for all financial assets not carried at fair value through profit or loss. The financial assets at fair value through profit or loss are initially recognized at fair value and transaction costs are recognized in the income statement. The investments are written off when the rights to receive cash flows from the investments have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership.

The financial assets available for sale and financial assets at fair value through profit or loss are reported in the next reporting period at fair value. Loans and receivables and investments held to maturity are assessed at amortized cost using the effective interest rate method.

The profits and losses arising from changes in fair value of financial assets at fair value through profit or loss are included in the comprehensive income statement under the heading "Net financial income" for the period in which they arise. Dividend income from financial assets at fair value through profit or loss are stated in the income statement as part of the "Net financial income" when the Company gets the right to receive payment.

The changes in the fair value of monetary securities denominated in foreign currency and classified as "available for sale" are divided into exchange differences arising from the changes in the amortized cost of the securities and the other changes in the carrying value of the securities. Foreign currency translation differences on monetary securities are recognized in profit or loss, while foreign exchange differences on translation of non-monetary securities are recognized in equity. The changes in the fair value of monetary and non-monetary securities classified as "available for sale" are recognized in the equity.

When securities classified as held for sale are sold or impaired, the accumulated fair value adjustments are included in the income statement as profits or losses from investment securities.

The dividends on equity instruments available for sale are recognized in the income statement as part of net financial income when the Company obtains the right to receive a payment.

The fair value of the quoted investments is based on the current market price. If the market financial asset is not active (for unlisted securities as well), the Company establishes the fair value by using valuation techniques that include the use of the recent market transactions in similar instruments, analysis of discounted cash flow valuation models and options, reflecting the market conditions at their maximum and the specific company information as little as possible.

At the balance sheet date the Company assesses whether there is objective evidence that a financial asset or group of financial assets is impaired. When the classified as available for sale equity securities are tested for impairment a significant or prolonged decline in fair value below the carrying is taken into account.

If there is evidence of impairment of financial assets available for sale, the cumulative loss (measured as the difference between the acquisition cost and the current fair value, minus any impairment loss recognized in a previous period in the income statement) is written off from the

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

equity and recognized in the statement of comprehensive income. Impairment losses on equity instruments are recognized in the income statement and can not be reversed through the statement of comprehensive income as a manifestation of the adverse effects of impairment. The testing for impairment of trade receivables is described in Appendix 2.10.

10. Inventories

Inventories are valued at the lower of cost and net realizable value. The costs incurred in order to ready the product for sale in a certain condition and location are included in the cost (cost of acquisition). These costs include:

a) materials and goods - all delivery costs, including import duties and taxes, transport costs, non-refundable taxes and other expenses that contribute to bringing the materials and goods in ready to use form;

b) goods and work in progress - cost of direct materials and labor and the deductible portion of manufacturing overheads based on normal operating capacity of production facilities. Basis for allocation of fixed production overheads by products is the amount of output.

The written-off for use and sale inventories are evaluated by the method of standard cost. Standard costs take into account normal levels of materials and supplies, labor, efficiency and capacity utilization. They are regularly reviewed and if necessary revised in the light of current conditions. Deviations from the standard costs to actual costs are written off for the sold goods and merchandise, and also at the end of each reporting period.

Net realizable value represents the estimated selling price of an asset in the ordinary course of business, less the estimated selling expenses. It is based on input data from external or internal sources and is consistent with the specifics of different types of inventories.

When inventories are sold, their carrying value is recognized as an expense in the period in which the related revenue is recognized. The amount of any impairment of inventories to net realizable value and all losses of inventories are recognized as an expense in the period or loss. The amount of any reversal of any write-down of the value of inventories arising from an increase in net realizable value is recognized as a reduction of the amount of eligible costs for inventories during the period in which the reversal occurs.

11. Trade receivables

The trade receivables are recognized initially at fair value and subsequently at amortized cost (by using the effective interest rate method), minus the provision for the impairment. The provision for impairment is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables. The significant financial difficulties of the debtor, probability of bankruptcy and financial reorganization or the inability to pay the debt (by more than 30 days) are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the carrying value of receivable and the present value of the estimated future cash flows discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the income statement as an expense for the activity. When a trade receivable is uncollectable, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited reduction in the operating expenses in the current result.

12. Cash and cash equivalents

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

Cash and cash equivalents include cash in hand, cash in banks, other short-term highly liquid investments with maturities within three months and bank overdrafts. In the balance sheet the overdrafts are included as a current liability in the category of short term loans.

13. Equity

The ordinary shares are classified as equity. The issuance costs of new shares, which are directly related to it, are shown in the equity as a deduction from the proceeds by eliminating the effect of the income taxes.

When the Company purchases its own shares, the amount paid, including any directly attributable incremental costs (the net of the effect of income taxes) is deducted from the possessed by the owners of the Company equity until the shares are canceled, sold or reissued. When such shares are subsequently reissued, any income, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the owners of the Company.

14. Trade liabilities

The trade liabilities are recognized initially at fair value and subsequently at amortized cost using the effective interest rate.

15. Loans

The loans are recognized initially at the fair value, decreased by the costs incurred in the transaction. The loans are subsequently stated at amortized cost, any difference between due payments (the net of the transaction cost) and the loan amount is recognized in the income statement over the period of the loan using the effective interest method.

The loans are classified as current liabilities unless the Company has an unconditional right to defer the settlement of the liability for at least 12 months after the balance sheet date.

16. Current and deferred taxes

The current income tax is calculated based on the tax laws enacted at the balance sheet date in the country where the Company generates taxable income. The management periodically reassesses its positions taken in tax returns with respect to situations in which the applicable tax regulation is subject to interpretation and establishes provisions where appropriate on the amounts expected to be paid to the tax.

The deferred tax is accrued using the balance method on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, if temporary tax differences arise from the initial recognition of an asset or liability where neither the accounting nor the taxable profit (loss) is affected during the transaction, this difference is not accounted for. In the calculation of deferred taxes are used tax rates (and regulations) current at the date of the balance sheet relating to the periods of expected reversal of the deferred income tax.

A deferred tax asset is recognized only when it is probable that there are sufficient amounts of future taxable profits against which these assets can be used.

EXPLANATORY NOTES TO

THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018

17. Employees' income

Under a defined contribution plan the Company pays installments to state-run pension plans and social security on mandatory basis. Once the installments have been paid, the Company has no further payment obligations. Installments are recognized as an expense for the staff when they become due. Prepaid installments are recognized as an expense in a future period to the extent that the amounts will be deducted from future payments or refunded.

From 2015 Tchaikapharma High Quality Medicines Inc. allocates provisions for retirement compensations of personnel as required under Article 222 of the Labor Code. The International Accounting Standard (IAS) 19 - Employee income treats this requirement as long-term liability of the employer for defined benefit severance and requires the application of actuarial methods for calculating the duty on the employer. The standard requires the present value of future obligations of the employer for defined benefit to be determined by applying the credit method of projected units.

Calculations are performed individually for all employees hired under an employment contract with the employer on the basis of their worked out and upcoming service. The general obligation is distributed throughout the expected length of service of the employee for the employer and the amount of the obligation at the time of the assessment is a proportionate part relating to the years of service. Each unit - year of service is measured separately to determine the final amount of the liability. Based on the structure of employees by gender and age, statistical probabilities persons not live to the age required to acquire a right to a pension or leave the employer for other reasons before they become eligible for retirement for contribution period and age were applied.

The calculation of these liabilities necessitates the participation of qualified actuaries in order to determine their present value at the date of the financial statements on which they are presented in the statement of financial status and the respective change in their value is presented in the statement of comprehensive income: a) the costs of current and past service, interest rates and the effects of redundancies and settlement are recognized immediately in the period in which they arise and presented in profit or loss under item "personnel costs" and b) the effects of subsequent evaluations of obligations which essentially represent the actuarial gains and losses are recognized immediately in the period in which they arise and are presented under other comprehensive income in the article "subsequent valuations of pension plans with defined benefit". Actuarial gains and losses arise from changes in actuarial assumptions and experience.

At the date of each annual financial statement, the Company appoints actuaries who provide their report with calculations regarding the long-term employee obligations for retirement benefits. For this purpose they apply the credit method of projected units. The present value of the defined benefit obligation is calculated by discounting the future cash flows expected to be paid within the maturity of that debt and using the interest rates on long-term government bonds with similar duration quoted in Bulgaria, where the company itself functions.

Since the provisions for personnel compensation have long-term nature of commitment they are reflected in the non-current liabilities in the Statement of the financial status of Tchaikapharma High Quality Medicines Inc.

The demographic assumptions reflect the probability persons appointed under an employment contract to stay with the employer at the time of pension entitlement for pensionable service and age, and an obligation to pay them a compensation to arise. Individuals may drop out before retirement for various reasons: retirement, staff cuts, disease, death and others. The demographic assumptions reflect specific probabilities that are based on statistical information on the population and are relating to the structure of the staff by gender and age at the time of the assessment.

Mortality tables reflect the probability persons to live to a specified age for entitlement to a pension. It is calculated individually for each person based on his/her gender and age at the time

EXPLANATORY NOTES TO

THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018

of the assessment. The table for mortality and average life expectancy of the population in Bulgaria for the period 2010 - 2012 of the National Statistical Institute is used.

Based on the information provided for the staff fluctuation in the last four years and the expected restructuring of the company over the next two years, the probability of retirements or impending personnel reduction is reflected. This probability is attached to the existing structure of staff according to the persons sex and age at the time of the assessment.

Financial assumptions are applied to the development of cash flow over time and affect the size of future commitment and determination of its present value. The agreed interest rates are a very important part of the evaluation process as they are used for discounting the expected future cash flows, as a result of which the capitalized value of future payments is obtained. The financial assumptions reflect real expectations for the development and future size of some basic parameters such as return on investment, wage growth, inflation and others. In determining the financial parameters the long-term nature of the obligation to the majority of employees should be borne in mind, according to the time when the liability to pay compensation will arise.

The applied rate of wage growth is essential for determining the amount of the obligation at the time of its occurrence. The size of this rate is determined on the basis of statistics on wage growth in the company over the past five years and the forecasted expectations for the coming years, according to the expected level of inflation. Given the statistics on income and employer's inflation expectations the projected wage growth is defined. The projected wage growth is 2 percent a year. According to the standard requirement, the at rate which the obligation will be discounted should correspond to the market yields at the balance sheet date that of the high quality corporate bonds. Provided that there is no developed capital market the market yields of government bonds should be used. Also it is convenient as a discounting rate to use the future rate of return on assets. Due to the long-term nature of the debt and the lack of such financial instruments covering fixed income for a longer period it is estimated that as a discount rate the expected rate of return on instruments with longer maturities may be used following the requirements of IAS 19. The discount rate, which is used in calculating the liability of TCHAIKAPHARMA HIGH QUALITY MEDICINES INC. as of 31.12.2016 amounted to 3 per cent per year over the duration of the liability, and as of 31.12.2017 amounted to 2 per cent per year over the duration of the liability.

As of 31.12.2018 amounted to 2 per cent per year over the duration of the liability.

In determining the time of retirement for all persons working under an employment contract with the company it is presumed that they will retire according to the requirement for a retirement age for workers under the fourth category of labor.

18. Provisions

Provisions for legal claims are recognized when the Company has a present legal or constructive obligation as a result of past events; more likely to occur (rather than not to occur) cash outflows to settle the obligation and when the amount of the debt itself can be determined reliably. Provisions for future operating losses are not recognized.

When there are several similar obligations, the probability of cash outflows arising for their coverage is estimated taking into account the whole class of obligations. The provision is recognized even in cases where the probability of cash outflow arising for this obligation of the class is minimal.

19. Lease contracts

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

Operating leases - the Company is lessor

Leases in which a significant portion of the risks and rewards are retained by the lessor are classified as operating leases. Revenue under the operating leases (offset by rebates from the lessor) is recognized as revenue in the income statement in equal installments over the period of the lease contract.

Financial leases - the Company is the lessee

Leases of property, machinery and equipment where the company actually bears all the risks and rewards arising from ownership are classified as finance leases. At their commencement, finance leases are capitalized at a lower than the fair value of the leased equipment and the present value of the minimum lease payments. Each lease payment is distributed between the liability and the finance costs so that the lease obligation declines steadily. Concomitant obligations for rent, reduced by financing costs are included in other long-term liabilities. The part of the interest in the financial cost is recognized in the income statement, so that over the lease period its size relative to the remaining lease obligation remains constant. Property, machinery and equipment acquired under finance leases are depreciated over the shorter of the useful lives of the asset and the lease term.

Leases of property, plant and equipment where the company actually has transferred all the risks and rewards arising from ownership are classified as finance leases with resulting receivables. At their commencement, finance leases are capitalized at the lower of fair value of leased equipment and the present value of the minimum lease payments. Each lease payment is distributed between the liability and the finance costs so that the lease obligation declines steadily. Accompanying lease obligations, less financial revenues are included in other long-term receivables. The portion of interest in the financial cost is recognized in the income statement so that during the period of the lease its size relative to the remaining lease obligation remains constant.

20. Revenue recognition

The revenue includes the fair value of goods and services, the net of value added taxes, rebates and discounts. The revenue is recognized as follows:

(a) Sales of products and goods

The revenues from sales of products and goods is recognized when all significant risks and rewards of ownership pass to the buyer. Assessment of income is carried at fair value of sold goods and merchandise, net of indirect taxes (value added tax) and any discounts and rebates.

In particular, the revenue from the sale of goods is recognized when all the following conditions are met:

- a) the company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- b) the company retains neither continuing management involvement with the goods, as this is usually associated with ownership nor effective control over goods sold;
- c) the amount of revenue can be measured reliably;
- d) the likely economic benefits associated with the transaction are received by the company; and
- e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

(b) Sales of services

The revenue from the rendered services is recognized for the period when they were made, based on the execution level, defined as the percentage of the rendered services to date out of all the services to be provided.

(c) Interest revenue

The interest revenue is deferred using the effective interest method. When a receivable is impaired, the Company reduces the carrying amount to its recoverable amount, which is the estimated future cash flows discounted at the original effective interest rate. The interest revenue

EXPLANATORY NOTES TO

THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018

on impaired loans is recognized either on the recovery of the due interest or on the basis of the recognition of the related contingent guarantees.

(d) Dividend revenue

The dividend revenue is recognized when the right to receive payment is established.

21. Dividend distribution

The distribution of dividends to shareholders is recognized as a liability in the financial statements in the period in which it is approved.

22. Critical accounting estimates and judgments

The estimates and judgments are based on gained experience and other factors, including expectations of future events under the specific circumstances. The reliability of estimates and judgments are reviewed regularly.

23. Critical accounting estimates and assumptions

The Company makes estimates and assumptions concerning the accounting and disclosure requirements, which may differ from actual results. Critical accounting estimates and assumptions that carry a significant risk of causing subsequent material adjustment to the carrying amounts of assets and liabilities are discussed below:

(a) Income taxes

The Company is subject to taxation within the jurisdiction of the tax authorities. Critical judgment is required to determine the tax provision. There are many transactions and calculations for which the finally determined tax is unspecified in the normal course of business. The Company recognizes liabilities for anticipated tax liabilities based on the discretion of management. Where the final tax outcome is different from the amounts initially recorded, such differences will have an impact on short-term tax and provisions for temporary differences between the tax revisions.

(b) Fair value of financial instruments

The fair value of the quoted investments in active markets is based on current market prices. If there is no active market for a financial instrument, the Company establishes fair prices, using the valuation models. This includes the use of recent transactions at fair prices, discounted cash flows, valuation models for options and other models used by market participants. Valuation models reflect current market conditions at the valuation date, which may not be representative of market conditions before and after that date. The management reviews its models to the balance date to ensure they appropriately reflect current market conditions, including relative market liquidity and credit spread. Due to changes in financial markets in recent times the fair value of financial instruments can significantly change during the next financial period.

(c) Impairment of receivables

In carrying out the impairment of receivables, the Company's management estimates that the amount and timing of expected future cash flows relating to claims based on its experience of similar nature receivable, taking into account the current circumstances for claims reviewed for impairment.

TCHAIKAPHARMA HIGH QUALITY MEDICINES INC.**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018****As of December 31, 2018**

Book (revaluated) value	4 913	766	0	5 679
Accumulated depreciation	(3 684)	(766)	0	(4 450)
Balance value	1 229	0	0	1 229

The amounts of the expenses for acquisition of long-term intangible assets are not included in the value. The noted assets are BGN 1 312 thousand as of 31.12.2017 and BGN 1 642 thousand as of 31.12.2018.

The intangible assets are assessed with an annual evaluation - cost less accumulated depreciation. According to the Management of the Company the carrying value of all of the assets is not less than their recoverable value and therefore there is no need for impairment.

3. Investments with minority participation

The Company holds minority interest in the following companies:

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Tchaikapharma High Quality Medicines Available For All Inc. (former name Care Pharmaceuticals)	1	1
Total	1	1

4. Non-current loans and non-current trade receivables

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
The maturity of long-term receivables is as follows:		
Up to one year	0	0
Between one and three years	6 853	5 960
Over three years		
Total	6 853	5 960

The balance value of the long-term receivables and loans is denominated in the following currencies:

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Euro		
BGN	6 853	5 960
Total	6 853	5 960

The Management of the Company believes that the fair value of long-term receivables and loans granted approximates their carrying value.

5. Inventories, trade and other receivables

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Trade receivables from clients	69 624	54 784

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

Advances from suppliers	116	217
Court awarded receivables	15	969
Tax refunds	92	-
Other receivables	2	2
Deferred expenses	18	26
Total trade and other receivables	69 867	55 998

In the fourth quarter no receivables were written off due to the expiry of their limitation period. The receivables are reported as annual evaluation at initial price of acquisition. The Company's management believes that the fair value of long-term receivables and loans approximates their carrying value.

The Management of the Company believes that the presented receivables are collectable and there is no need of impairment of receivables from previous years that amount to BGN 6 853 thousand, and for which an agreement of payment during the current year was concluded.

The balance amount of trade and other receivables of the Company is denominated in the following currencies:

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
BGN	69 852	55 815
Euro and USD	15	183
Total	69 867	55 998

Deferred taxes				
Other comprehensive income			(19)	(19)
Distributed profit		931		931
Balance on December 31, 2018	3 641	6 477	(34)	10 084

The reserves from revaluation of land and buildings are formed as a result of comparison between the fair values and carrying amounts under previous report of a licensed appraiser. The reserves from revaluation of land and buildings are non-distributable as dividends.

The reserves from revaluation of pension funds are formed as a result of the effects of subsequent evaluations of obligations which essentially represent the actuarial gains and losses according to a

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

report of a certified actuary. The reserves of actuarial revaluations can not be allocated in the form of dividends.

9. Loans

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Non-current finance lease liabilities	324	590
Current finance lease liabilities	265	491
Short-term loan	9 777	9 784
Total	10 366	10 865

The terms of the short-term bank loans as of 31.12.2018 are as follows:

Creditor bank:	United Bulgarian Bank AD
Contractual amount of the credit:	BGN 7 823 thousand (EUR 4 000 thousand)
Annual interest:	Three month EURIBOR+addition of 2 points
Maturity:	20.12.2021
Collateral:	Mortgages and pledges
Purpose of the credit:	Refinancing of existing credit and for working capital
Liabilities as of 31.12.2018:	BGN 7 823 thousand

Creditor bank:	United Bulgarian Bank AD
Contractual amount of the credit:	BGN 1 956 thousand (EUR 1 000 thousand)
Annual interest:	Three month EURIBOR+addition of 2 points
Maturity:	20.12.2021
Collateral:	Mortgages and pledges
Purpose of the credit:	Working capital
Liabilities as of 31.12.2018:	BGN 1 954 thousand.

10. Deferred taxes

The deferred income taxes are reported for all temporary differences between the tax bases of assets and liabilities and their balance value for financial reporting purposes at a tax rate of 10% (for the previous year: 10%) applicable for the year in which they are expected to occur retroactively.

The movement of the deferred taxes are as follows:

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
At the beginning of the year	(1 284)	(1 284)
(Income)/expenses in the Statement of comprehensive income	34	34
(Income)/expenses in the Statement of equity	(58)	(58)
At the end of the year	(1 308)	(1 308)

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

Deferred tax liabilities

	Land and buildings	Amortizations	Total
	BGN thousand	BGN thousand	BGN thousand
As of January 1, 2017	(275)	(1 025)	(1 300)
Debit/(credit) in equity due to changes in temporary differences	(60)		(60)
Expenses/(income) in the statement of comprehensive income due to changes in temporary differences		28	28
As of December 31, 2017	(335)	(997)	(1 332)
Debit/(credit) in equity due to changes in temporary differences			
Expenses/(income) in the statement of comprehensive income due to changes in temporary differences			
As of December 31, 2018	(335)	(997)	(1 332)

	Leaves and income	Receivables and payables	Total
As of January 1, 2017	13	3	16
Expenses)/(income) in the statement of comprehensive income	10	(2)	8
As of December 31, 2017	23	1	24
Expenses)/(income) in the statement of comprehensive income			
As of December 31, 2018	23	1	24

The total amount of deferred tax assets and liabilities is a liability in the amount of BGN 1 308 thousand (2017: liability of BGN 1 308 thousand).

The deferred tax assets and liabilities are offset as they relate to the same tax authority.

Long-term liabilities to employees

	As of December 31st	
	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Long-term liabilities to employees at retirement	119	83
	119	83

The Company has appointed certified actuaries who provide their report with calculations regarding the long-term employee obligations for retirement benefits. For this purpose they apply the credit method of projected units. The present value of the defined benefit obligation is calculated by discounting the future cash flows expected to be paid within the maturity of that debt and using the interest rates on long-term government bonds with similar duration quoted in Bulgaria, where the company itself is operating.

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018****11. Trade and other liabilities**

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Liabilities to suppliers	3 523	1 716
Liabilities to personnel	352	309
Taxes and social security	106	305
Current corporate tax	-	78
Other liabilities	213	15
Total	4 195	2 423

The liabilities in BGN are valued at the value of their occurrence, and those in foreign currency at the rate of BNB on 31.12.2018.

Trade payables are carried at original cost at nominal value of the BGN and the equivalent of foreign currency at the exchange rate of BNB.

All trade and other payables are denominated and valued at the BGN nominal value. The Company's management believes that there is no need to charge provisions in relation to claims or commitments to interest, penalties and other payment obligations.

12. Income

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Sales of produce	32 248	27 807
Sales of goods	6 119	5 480
Sales of services	97	72
Changes in inventories of finished goods and work in progress	-	-
Other income	46	76
Total	38 510	33 435

The sales of goods and products are related to dosage forms. They take place throughout the country. The revenue is evaluated at the fair value of the consideration received or receivable payment or remuneration, as measured in the BGN nominal value.

Expenditure on salaries	(3 302)	(2 950)
Social security expenditure	(588)	(594)
Depreciation costs	(3 272)	(3 084)
Others	(2 406)	(1 692)
Total	(25 617)	(23 333)

The operating costs are related to production and sales of dosage forms.

EXPLANATORY NOTES TO**THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

The costs are measured at the fair value of consideration paid or payable, and are measured in the BGN nominal value or equivalent of foreign currency at the exchange rate on the day of the transaction.

14. Financial income and expenses**14.1. Financial income**

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Interest income	3	
Income from exchange rate differences	14	88
Other financial income	-	-
Total	17	88

The revenues generated from the use by other entities assets yielding interest and other financial transactions are recognized when it is probable that future economic benefits associated with the transaction and the amount of revenue can be measured reliably.

14.2. Financial expenses

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Interest expenses	(325)	(275)
Expenses on operations with financial instruments	(1)	-
Expenses for exchange rate differences	(54)	(48)
Other financial expenses	(58)	(58)
Total	(438)	(381)

The costs generated by the use by the Company of assets yielding interest of other entities, as well as other financial operations are recognized when it is probable that the Company reduces the economic benefits associated with the transaction and the amount of the costs can be measured reliably.

15. Tax expenses

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Current expense for income tax	(1 120)	(1 012)
Deferred taxes		34
Total	(1 120)	(978)

For 2018 the tax rate remained unchanged at 10% (2017 - 10%) in accordance with the Corporate Income Tax Act.

The tax on the Company's profit differs from the theoretical amount that would arise in applying the applicable tax rate to the accounting result before tax as follows:

31.12.2018	31.12.2017
BGN	BGN
thousand	thousand

TCHAIKAPHARMA HIGH QUALITY MEDICINES INC.

EXPLANATORY NOTES TO THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018

Tax expense in the income statement	(11 352)	(978)

	31.12.2018	31.12.2017
	BGN	BGN
	thousand	thousand
Other comprehensive income from revaluation of fixed assets		539
Other comprehensive income from deferred tax on revaluation of fixed assets		(60)
Other comprehensive income from the revaluation of pension funds with defined benefits		(3)
Other comprehensive income from deferred tax on revaluation of pension funds with defined benefits		1
Total amount of other comprehensive income		477

For the fourth quarter of 2018 no revaluation of land and buildings had been made and no reserve for staff payables had been allocated.

16. Profit per share

Basic profit per share

The basic profit per share is calculated by dividing net income for distribution to major shareholders by the weighted average number of issued ordinary shares during the year, of which the average number of repurchased ordinary shares by the Company is subtracted.

Profit per diluted share

For the purposes of calculating profit per share with reduced value, weighted average number of issued ordinary shares is adjusted with all securities potentially convertible into ordinary shares. As of December 31 of the current year and the previous year the Company has not issued any convertible securities.

17. Dividends per share

At the General Meeting of Shareholders profit distribution for 2015 for capital increase by BGN 7 000 thousand and increase of reserves by BGN 780 thousand were voted.

At the General Meeting of Shareholders held on 08.06.2017 a decision was taken to increase the capital by BGN 7 700 thousand and increase the reserves by BGN 885 thousand.

At the General Meeting of Shareholders held on 30.04.2018 a decision was taken to increase the capital by BGN 7 900 thousand and increase the reserves by BGN 931 thousand.

18. Contingent liabilities

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

The Company is currently engaged in litigation with other entities for about BGN 15 thousand. The Company has no other substantial contingent liabilities and commitments under contracts, litigations and other documents.

Taxation

The Tax authorities carried out a full audit of the Company until and including 2005. No significant violations or notices were detected.

The tax authorities may at any time inspect the books and records within five consecutive years starting from 1 January of the year following the year in which it was necessary to pay the tax, and impose additional tax liabilities or penalties. Company's management is not aware of any circumstances which could give rise to a potential material liability in this field.

19. Remuneration to key managerial personnel and audit costs

Policy on remuneration of key management personnel is published in the Annual Financial Statements for 2018. Audit costs were accrued in the fourth quarter of 2018 in accordance with the contract concluded.

20. Financial risk management

By carrying out its activities, the Company is exposed to multiple financial risks. The programme of the Company's overall risk management focuses on the unpredictability of financial markets and seeks to minimize the potential adverse effects on the financial performance of the Company. The Company does not use derivative financial instruments to hedge certain risk exposures.

(a) Foreign exchange risk

The Company is not exposed to significant risks associated with foreign exchange rates, as most of its assets, liabilities and transactions are denominated in BGN or Euro and BGN is pegged to the euro, according to the rules of the Currency Board. Regular monitoring is carried out on the items of the balance sheet in order to minimize exposure to foreign exchange risk.

(b) Price risk

The Company is not exposed to risk from changes in the price of the equity securities due to the lack of such investments. The Company is exposed to the risk of changes in prices of goods and merchandise. For the purposes of managing price risk arising from sales of services, the Company systematically monitors market prices, optimizes costs and seeks appropriate key customers.

(c) Interest risk

Interest bearing assets of the Company can be with fixed and with floating interest rates. The loans with variable interest rates expose the Company to interest rate risk of changes in future cash flows and loans with fixed interest rate - the interest rate risk of changes in fair value. The Company's policy is to borrow and grant loans, while minimizing interest rate risk. As of 31st of December of the current and the previous year the Company had interest bearing assets and liabilities measured at fair value and therefore is not exposed to risk of changes in cash flows and fair value.

(d) Credit risk

The Company has no significant concentration of credit risk. The Company has established policies in place to ensure sales to major customers with immediate payment or payment within a reasonable period of time in accordance with the agreements. The credit risk arises principally from cash and cash equivalents and deposits with banks and other financial institutions, as well as loans granted. For banks and other financial institutions are accepted only

**EXPLANATORY NOTES TO
THE INTERIM FINANCIAL REPORT AS OF THE 31th OF DECEMBER 2018**

institutions with high credit ratings. The management does not expect losses due to default of their counterparties.

All financial assets are with counterparties that have no external credit rating and no unfulfilled obligations in previous periods.

(e) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and other liquid assets. Due to the dynamic nature of the principal types of businesses, the Financial Department of the Company aims to achieve funding flexibility by keeping sufficient cash and trade receivables that can be used to cover liabilities within reasonable time.

Equity risk management

The Company's objectives when managing the capital are to safeguard the ability of the Company to continue as a going concern in order to provide returns for the shareholders and to maintain optimal capital structure.

In order to maintain or modify the capital structure, the Company may adjust the amount of dividends paid, return capital to shareholders, issue new shares or sell assets to pay off debts. In addition to this, managing liquidity and capital structure of its subsidiaries, the Company may increase its share capital or take loans.
